

Association's Message

Mr Edmond Ng
President
Singapore Microcomputer Society

Multimedia and the Internet - these are the two key components that push the implementation of technology to what it is today, and what it will be tomorrow and beyond.

The *intermedia & Internet Asia '96* Conference & Exposition marks the exemplary focus of these two components in its implementation and forecast of what information technology can provide to us today. The Conference, which features a panel of industry experts from the public and private sectors from all over the world, will provide crucial information and essential workshops toward the significant growth of the changing advancement of technology. The Exposition, will likewise, mark the premier showcases of the latest technology in on-line information and multimedia.

The Conference and Exposition will promise to be an industry awareness and technological advancements eye-opener to the corporations world-wide and will also offer the opportunity for a collaborative participation and implementation.

The Singapore Microcomputer Society is therefore proud to support this Asia-Pacific Premier Conference and Exposition, and wishes all participants, speakers, exhibitors and visitors a very fruitful and successful collaborative participation at *intermedia & Internet Asia '96*.

Mr Edmond Ng
President
Singapore Microcomputer Society

ADVISORY COMMITTEE

intermedia and Internet Asia conference was brought together by professionals and leaders in the multimedia & Internet industry who have dedicated their time and experience to organise a world class conference for this region.

Mr Edmond Ng, President, Singapore Microcomputer Society. During his time with the Singapore Microcomputer Society, Edmond has played a major role in the publicity of the Society under the role of Public Relations and as the Chairman of the Computerisation Group. He has contributed in communicating and working with software and hardware manufacturers, such as Microsoft, IBM, Novell, Corel, Lotus, Intel, Symantec and others in presenting at the society's weekly meetings on the trends, the software and hardware that is in the marketplace, including the educating of members' knowledge in microcomputing. Edmond also writes for the Society's newsletter, *MicroLines* and other computer magazines and computer newspapers.

Message from the Endorsing Association

MR EDMOND NG

President

**SINGAPORE MICROCOMPUTER
SOCIETY**

The Singapore Microcomputer Society is proud to support The PC / Software Show for the fifth consecutive year.

Since its introduction in 1991, The PC Show has received a wide participation of players in the IT industry including the developers, vendors, distributors and dealers, as well as the users.

In moving towards the aim of IT2000 and the foresight of a microcomputer on every desk in every home, the Society aims to play a major role in working towards achieving that goal. But, in order to achieve the worldwide goal of total IT implementation, IT should not be targeted only for the professionals, but as an objective, should also be reachable even to the ordinary.

In this, we believe that The PC Show will play a significant role in promoting quality and excellence in the advancement of not only office automation, but also home innovation and education, setting the pace to a greater height towards better quality products and innovative achievements, and eventually a better lifestyle and a better tomorrow.

Members of SMS will be able to view at this show, the implementation of IT today. In supporting The PC Show, the Society is committed to the task of providing not only to its members, but also to the community, a continued up-to-date practical education of the day to day operations in microcomputing in its weekly meetings and presentations.

The Society welcomes all delegates and exhibitors to The PC Show and wishes them a fruitful participation and collaboraton.

MESSAGE

Mr Edmond Ng
President

**Singapore
Microcomputer
Society**

On behalf of the Singapore Microcomputer Society, I would like to wish all exhibitors and delegates a warm welcome to the COMEX '95 exhibition.

It is indeed the Society's pleasure to once again endorse this event. COMEX has for the past years grown to become a leading regional exhibition for the IT people, among which the vendors, distributors, dealers and visitors alike, takes an active participation. The show features down-to-earth day-to-day technology in the form of IT implementation in the region. Visitors will certainly be delighted to get first-hand, technological equipment and knowledge of the advancing technologies of tomorrow.

We believe that the COMEX exhibition, will certainly play a vital role in promoting to the region, the technological improvements in its exhibiting of innovative achievements in IT today.

As we look forward to the emerging force of technological advancement towards IT2000, the Singapore Microcomputer Society is committed to continue to equip anyone, regardless of age or status, in the up-to-date practical education of the day-to-day operations in computer literacy to enter to the fast moving information age.

SMS wishes all participants, exhibitors and visitors, a fruitful collaborative participation at COMEX '95.
